ONE DIRECT MILL

SOLID DOOR

Our solid interior door is manufactured with a solid tubular core, which is ideal for guaranteeing excellent durability, as it offers high resistance to shock and thermal shock, and helps us to reduce noise passage.

COMPOSITION

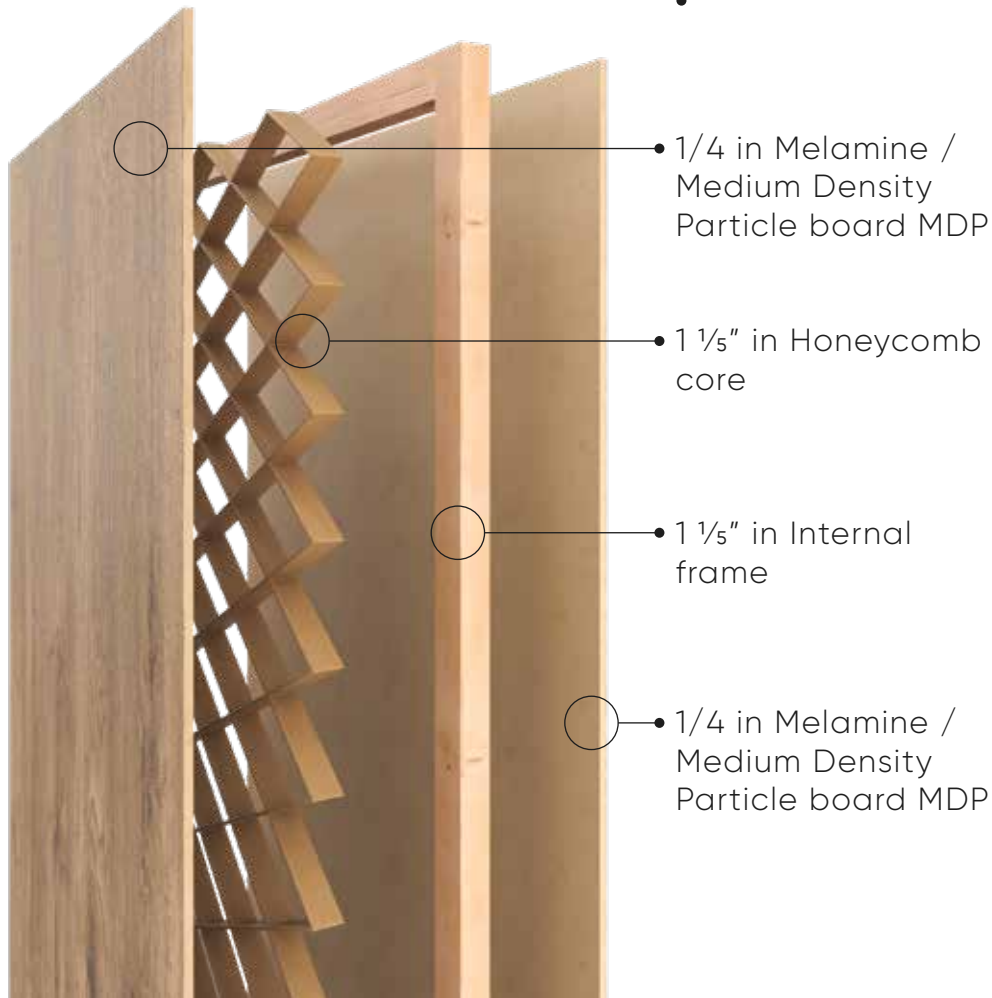

QUALITIES

SEMISOLID DOOR / HOLLOW DOOR

Our hollow interior door is manufactured with a honeycomb inner core, which makes this door semi-solid, lightweight and easy to install. This door maintains our quality standards at a more affordable price.

AND MOLDING TYPES

ONE DIRECT MILL

ADJUSTABLE FRAME AND MOLDING

SPECIFICATIONS:

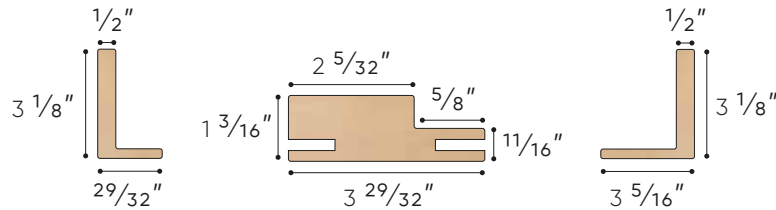

Frames made of solid wood pine and melamine.

FRAME FINISHES:

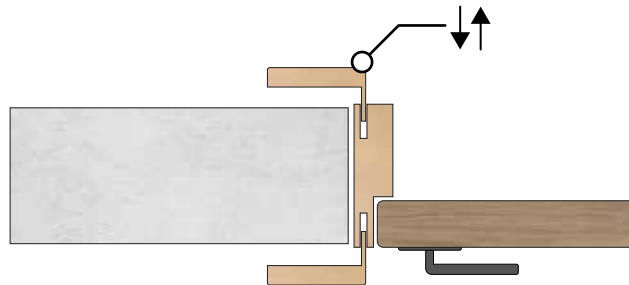

Solid wood pine with PVC melamine veneered edge.

DIMENSIONS:

Up to 94 1/2" height

ADJUSTABLE FRAME:

WITH WEATHER STRIP

MATERIAL:

Rubber

USES AND BENEFITS:

- Limits the passage of light, bugs and dust
- Helps to regulate the temperature
- Prevents air drafts
- Limit exit/entry of smells
- Antibacterial properties
- Helps to save energy

STRAIGHT FRAMES AND MOLDINGS

SPECIFICATIONS:

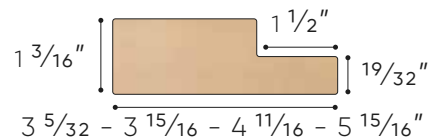

Frames made of wood solid pine and board melamine.

FRAME FINISHES:

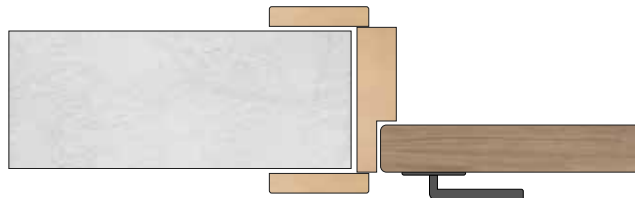

Solid pine wood strip with PVC veneer. Veneered melamine board in PVC edge.

DIMENSIONS:

Widths of 3-4-5-6"
Maximum height of 94 1/2"

STRAIGHT FRAME:

WITH WEATHER STRIP

MATERIAL:

Rubber

USES AND BENEFITS:

- Limit the passage of light
- Prevents the passage of dust and insects
- Regulates the temperature
- Prevents drafts
- Limit exit/entry of smells
- It is antibacterial
- Very useful on outings of emergency
- Helps to save energy

Width: 13 7/32 Height: 95 5/8 Thickness: 13/16	3 units of wallpanel can cover 39 23/64" . Maximum area covered: 3766 1/2" square.

PANEL SIZES:

- Wallpanel $25\frac{5}{32} \times 3\frac{3}{8}$ "

TOTAL DIMENSIONS

Width: **13 $\frac{3}{4}$**
 Height: **95 $\frac{5}{8}$**
 Thickness: **13 $\frac{3}{16}$**

SUPPLY / COVERED AREA

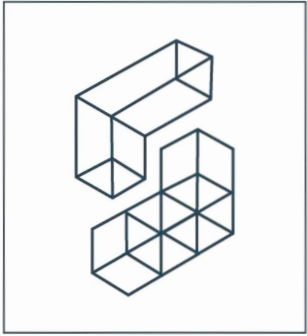

3 units of wallpanel can cover **41 $2\frac{1}{64}$** ".

Maximum area covered: **3875"** square.

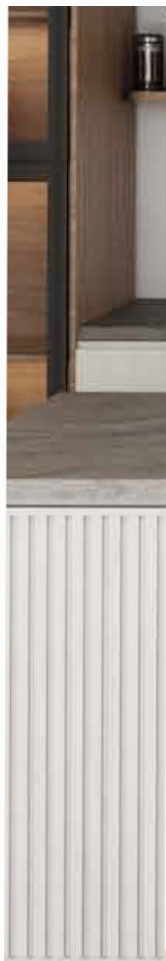

USES & RECOMMENDATIONS

- The wallpanel is applied on vertical surfaces.
- The wallpanel is quick and easy to install without the need for drilling, screws or wooden sleepers.
- The wallpanel can be applied in home and commercial furniture.
- Dekopanel should not be applied outdoors.
- Cut the panels according to the defined measurements (Remember that the panels can be cut with hand saws or fine-toothed jigsaws).
- Apply a bead of glue with a maximum thickness of $\frac{3}{4}$ " on both sides of the panel.
- Cleaning should only be done with a dry, abrasive-free cloth. If it is necessary to use a foam, moisten with neutral soap and dry immediately.
- For a correct use of the wallpanel, the wall or surface must be totally aligned, smooth and without imperfections, completely clean and free of dust and grease.
- It is recommended to install on the baseboard without touching the floor.
- For irregular surfaces it is recommended to use the traditional method with wooden ledger strip and screws is recommended for uneven surfaces.
- It is recommended to seal the part that goes to the floor with epoxy paint or silicone. epoxy paint or silicone.
